INTTRVU

Advanced Certificate Program in

GENERATIVE AI & AGENTIC AI

NASSCOM Certified Program

Integrated with Enterprise AI Leadership

Rohit Mande

Founder, INTTRVU.AI
Former Chief Data Scientist, Barclays

Click on the icon
To know more about the founder

Hello, I am **Rohit Mande**, Founder and CEO of **INTTRVU.AI**
(Ex-Chief Data Scientist, Barclays).

Over the past decade, I have built and delivered multiple Data Science and AI projects across diverse domains. My passion lies in helping individuals successfully transition into impactful tech careers.

With this vision, and together with a team of like-minded experts, we founded INTTRVU.AI, a platform dedicated to bridging the gap between learning and real-world application.

Our Advanced Certification in Generative and Agentic AI is a comprehensive, industry-driven program designed to equip learners with the latest GenAI and Agentic AI skill sets demanded by the market, along with the strategic and leadership capabilities required for enterprise adoption.

This program goes beyond technical training. It emphasizes hands-on learning, real-world projects, AI strategy, governance, and leadership readiness enabling experienced professionals to design, execute, and lead Generative and Agentic AI initiatives within organizations.

I look forward to engaging with you during the program and being part of your journey toward an exciting career in Generative and Agentic AI.

Future Proof Your Skills with GENERATIVE AI & AGENTIC AI

59%
Indian Enterprises already use AI

₹10 LPA – ₹60 LPA
Average Salary Range

$ 126.9 Billion
Market size by 2029

80%+
Indian companies adopting Generative & Agentic AI

45%
Annual Growth Rate

Emerging Job Roles in GENERATIVE AI & AGENTIC AI

1. Applied Gen AI & AI Development Roles

- Generative AI Engineer
- Prompt Design Specialist
- NLP & Text Intelligence Engineer
- LLM Engineer
- AI Solution Developer
- AI Innovation Engineer

2. AI Strategy, Product & Consulting Roles

- AI Transformation Lead
- GenAI Product Manager
- AI Solutions Architect
- AI Strategy Consultant

3. Software Engineering & Research Roles

- AI Software Engineer
- Open Source AI Contributor
- Applied Research Engineer
- Full Stack AI Developer

4. Emerging & Cross-Functional AI Roles

- Conversational AI Designer
- Human-AI Interaction Designer
- AI Content Strategist
- AI Prompt Trainer

5. Agentic AI & Multi-Agent Trainer System Roles

- AI Agent Developer
- Multi-Agent Systems Engineer

Program Highlights

Program Duration - 5 Months (Live Sessions)

Value Added Live Python Foundation Course

10+ Domain Specific Capstone Projects

Dedicated Learning Support for Queries

10+ Real World Case Studies and Assignments

Session Recordings Available Anytime

AI Strategy & Enterprise Leadership Sessions

Weekly Doubt Solving Sessions

Learning Path

Month 1

Foundations of Generative AI

- Python for Gen AI
- Introduction to Machine Learning
- Neural Networks & Deep Learning
- Natural Language Processing (NLP)

Month 2

Generative AI, LLMs & Prompt Engineering

- Introduction to Generative AI
- Large Language Models (LLMs)
- Prompt Engineering
- Enterprise Prompting Strategies

Month 3

RAG, LangChain, Vision Models & AI Agents

- Retrieval Augmented Generation (RAG)
- LangChain Chatbot Creation
- Large Vision Models (LVMs)
- Stable Diffusion & Image Generation
- AI Agents & Multi-Agent Systems
- Phidata & CrewAI

Month 4

Multi-Agent Development & Fine-Tuning

- Model Context Protocol (MCP)
- n8n Multi-AI Agent Automation
- Small Language Models (SLMs)
- LLM Fine-Tuning on Domain Specific Datasets

Month 5

LLM Engineering, LLMOps & Enterprise AI

- Cloud Platforms for Generative AI
- LLMOps (Docker, Deployment, Monitoring)
- Enterprise Leadership & Execution for Generative & Agentic AI
- Governing AI for Impact: Risk, Compliance & Ethical Leadership

Month 6

Capstone Projects & Job Readiness

- Capstone Projects on Domain-Specific Datasets
- Mock Interviews & CV Review
- LinkedIn Profile Optimization
- Interview Preparation Material
- NASSCOM Certification Test

Who Is This Program For?

- Senior Software Engineers, Tech Leads, Solution Architects, Enterprise Architects, Data Science, Analytics, and AI Professionals.
- Project Managers, Program Managers, Delivery Heads, Engineering Managers.
- Product Managers, Business Leaders, Digital Transformation Heads, CXOs.

Program Syllabus

Python for Gen AI

Variables and Data types
- Introduction to variables
- Different types of data-types in python

Loops and conditions
- For loop syntax and examples
- Loop control statements

Data Structures
- Introduction to Data Structure and their methods

Functions
- Function definition and calling
- Parameters and return values

Object-oriented programming
- Object-oriented programming concepts overview
- Class & object creation

Pandas
- Introduction to Pandas
- DataFrames and Series
- Merge, filter and sort operations in Pandas

Reading data from API
- Retrieving data from APIs

Machine Learning

Introduction to Machine Learning
- Supervised Learning - Regression and Classification
- Unsupervised Learning - Clustering

Deep Learning

- Overview of Neural Networks
- Understanding activation functions and its importance
- Introduction to Deep Learning
- Deep Neural Networks (DNNs)
- Training Neural Networks
- Forward Propagation
- Backpropagation
- **Hands-On Live Session: Build Machine Learning Model using Neural Networks**

Natural Language Processing

- Introduction to text preprocessing
- Introduction to Word Embeddings
- Word2Vec architecture and models
- Training Word2Vec models
- Applications of Word2Vec in NLP
- **Hands-On Live Session: Sentiment Classification using Neural Networks**

LLM and ChatGPT

Generative AI

- What is Generative AI?
- Transformers
- BERT
- Understanding Large Language Models

ChatGPT

- How ChatGPT was trained?
- How to use ChatGPT ?

Prompt Engineering

- Introduction to Prompt Engineering
- Zero-shot, One-shot, Few-shot prompting
- Instruction-based vs Conversational prompts
- Chain-of-Thought prompting
- Prompt Engineering settings: temperature, top-p & max tokens
- Prompt Engineering real-world examples
- **Hands-On Live Session: Prompt Engineering**

RAG and Langchain

RAG

- Introduction to RAG
- Core components of RAG
- Tools and Vector Databases Used for retriever (FAISS, ChromaDb, Pinecone)
- LLM integration (OpenAI, LLaMA, etc.)
- Key techniques in RAG
- Evaluation methods & metrics
- Advantages of RAG
- Challenges & Limitations
- Applications of RAG

Langchain

- Introduction to Langchain
- Core components of LangChain
- Key features and capabilities
- Use cases of LangChain
- **Hands-On Live Session: Build a chatbot using RAG to answer questions on Automotive Engineering**

Large Vision Models & Stable Diffusion

Large Vision Model

- Introduction to Vision Models
- Architecture & Working of Vision Transformers (ViT)
- Applications: Image Captioning, Visual QA, OCR

Stable Diffusion

- What is Diffusion? How Stable Diffusion works
- Architecture Breakdown: U-Net, VAE & Text Encoder
- Prompting for Image Generation (Prompt + Negative Prompt)
- Safety, Bias & Limitations in AI-Generated Images
- **Hands-on Live Session: Generate & Edit Images with Stable Diffusion**

AI Agents - CrewAI and Phidata

AI Agent and Multi- AI Agents

- Introduction to AI Agent
- Model
- Orchestration
- Tools
- Multi Agent System
- Agentic AI
- Managing risk in AI Agents

Phidata

- Introduction to Agentic AI using agno (Phidata)
- Core Components of agno
- **Hands-On Live Session: Build AI Agents using agno (Phidata)**
- **Hands-On Live Session: Build Multi AI Agent with custom tools using agno (Phidata)**

CrewAI

- Introduction to CrewAI
- Why CrewAI
- CrewAI Architecture
- Tasks, Processes and Collaboration patterns
- **Hands-On Live Session: Build Multi AI Agent with custom tools using CrewAI**

Model Context Protocol

- What is MCP and why is it needed?
- Components of MCP
- Key technical features in MCP
- Advantages and Limitations of MCP
- **Hands-On Live Session: MCP-Enabled AI Application**

n8n for Multi-AI Agents

- Introduction to n8n
- Nodes, Triggers, Workflow Execution
- Connecting to LLMs (OpenAI, Gemini, Llama, etc.)
- Designing Multi-Agent Workflows using n8n
- Integrating External Tools (Databases, Webhooks, Custom APIs)
- **Hands-On Live Session: Build Multi-AI Agent Automation using n8n**

Small Language Model (SLMs)

- What is small language model
- Exploring models like Llama, Mistral etc.
- Running SLMs locally or on-prem
- Evaluating and selecting SLMs for your use case
- Introduction to Hugging Face
- Loading pre-trained SLM from Hugging Face
- **Hands-On Live Session: On-Prem RAG System using SLMs from HuggingFace**

LLM Fine Tuning

- Introduction to LLM Fine Tuning
- General fine tuning vs memory efficient fine tuning
- Low Rank Adaptation(LoRA)
- Quantized Low Rank Adaptation(QLoRA)
- Parameter Efficient Fine Tuning(PEFT)
- UNSLOTH Memory Efficient Fine Tuning
- **Hands-On Live Session: Fine tune LLM on domain specific dataset**

Overview of Cloud Platforms for Gen AI

- Introduction to AWS Bedrock
- Introduction to Microsoft Azure OpenAI
- Using Amazon Bedrock for multi-model access
- Using Microsoft Azure OpenAI for GPT-4 & Advanced Models
- **Hands-On Live Session: Developing RAG pipelines on AWS vs. Azure**

LLMOps

- From prototype to production LLMs
- Building and serving GenAI models as scalable REST APIs
- Containerizing applications with Docker
- Deploying GenAI services on cloud platforms
- Monitoring, logging, and alerting for production readiness
- **Hands-On Live Session: Deploy RAG based chatbot on AWS using docker**

Enterprise Leadership & Execution for GENERATIVE AI & AGENTIC AI

AI Project Lifecycle & Enterprise Adoption

- Understand the life cycle of an AI project from idea to deployment
- The **POC → MVP → Deployment** approach used in enterprises
- Manage uncertainty, risk, and expectations during AI projects
- Plan adoption and change management across teams
- Role of cloud platforms in deploying AI solutions
- **Case Studies: AI pilot for predictive maintenance in a manufacturing plant.**
  Learn how the project moves from POC to deployment with business sign-off.

AI Strategy for Enterprise Transformation

- Differences in managing GenAI / Agentic AI vs traditional software projects
- Traditional ML vs rule-based systems vs AI agents: when to use what
- Identifying high-impact AI opportunities for enterprise transformation
- Linking AI initiatives to business strategy
- Emerging trends and challenges in enterprise AI adoption
- **Case Studes:**

  Retail Bank: Identifying High-Impact AI Opportunities

  Identify three high-impact AI opportunities in operations, customer experience, and internal knowledge management. Recommend initiatives that could deliver measurable business impact within 12–18 months.

AI Use Case Prioritization & Business Value

- AI opportunity discovery frameworks
- Evaluating use cases using impact vs feasibility
- Defining project scope and resource planning for AI initiatives
- Setting KPIs linked to business impact and ROI
- Building business cases for AI investments
- **Case Studies:**

Insurance Company: Choosing AI Initiatives to Fund

Evaluate five potential AI initiatives, including claims automation, fraud detection, and underwriting support. Recommend two initiatives to prioritize based on impact, feasibility, and ROI.

AI Product Thinking & Enterprise Platforms

- AI as a product vs feature: lifecycle, ownership, and accountability
- Continuous learning systems vs static software delivery
- Planning AI platforms vs isolated AI initiatives
- Reusable AI capabilities and enterprise architecture
- **Case Studes:**

Manufacturing Company: AI Platform vs Multiple AI Tools

Decide whether to continue with independent AI pilots or build a shared enterprise AI platform. Assess the impact on scalability, cost, and long-term AI adoption.

Designing Trustworthy AI Systems

- Human-in-the-loop workflows in GenAI and Agentic AI systems
- Trust, explainability, and transparency in AI outputs
- Managing hallucinations and error risks
- Designing safe decision workflows involving AI agents
- **Case Studies:**

Financial Advisory Firm: AI Investment Analysis Assistant

Design a human-in-the-loop workflow for an AI assistant generating market insights. Define checkpoints where human analysts validate AI outputs.

AI Technology Strategy & Vendor Selection

- Build vs Buy vs Partner strategies for AI solutions
- Evaluating foundation models and enterprise AI platforms
- Vendor lock-in, IP risks, and data sharing considerations
- Integration and operational planning for AI systems
- **Case Studes:**

Healthcare Provider: Selecting an AI Platform

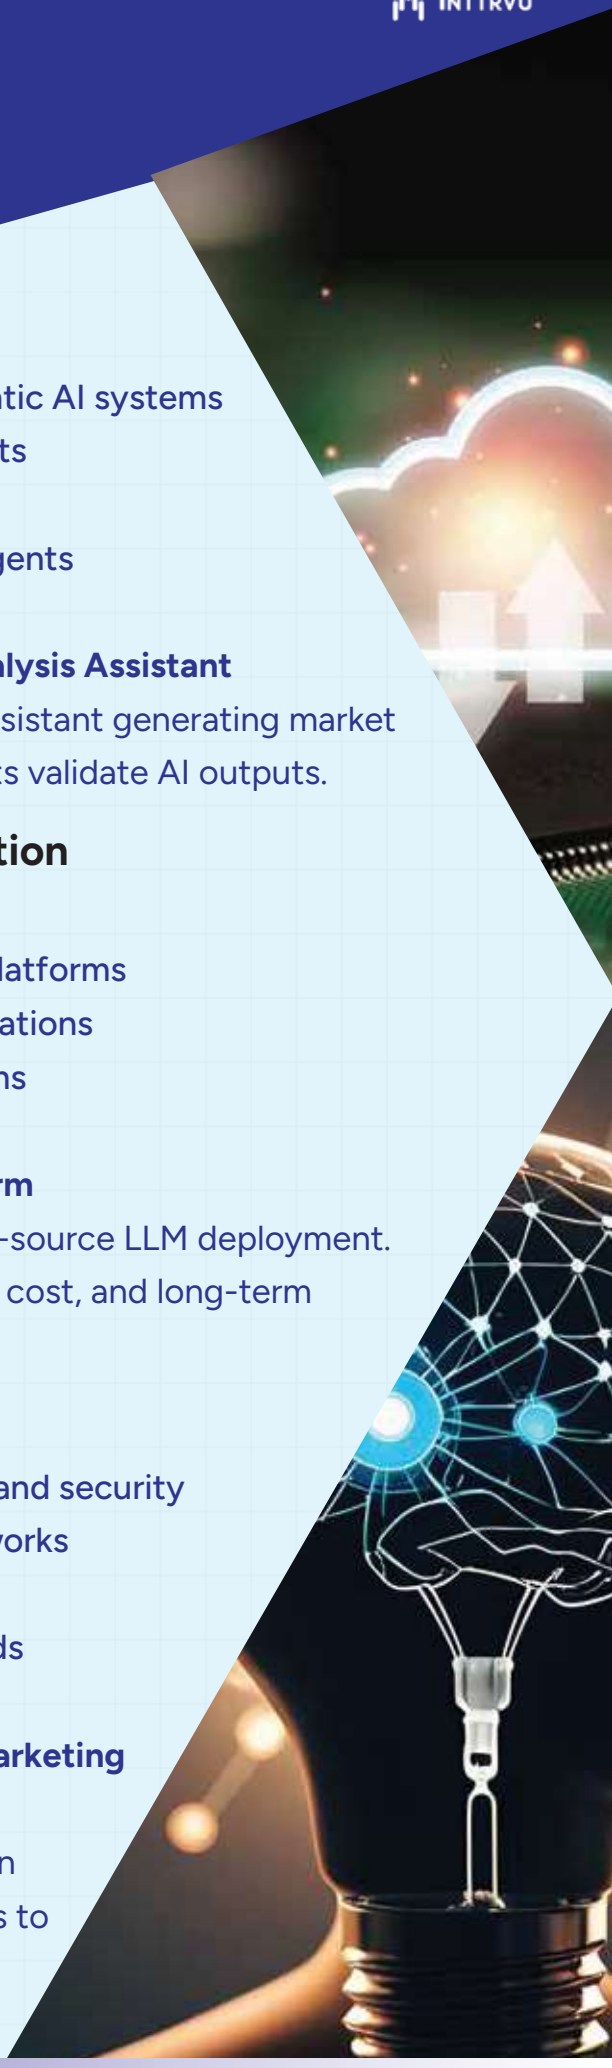

Compare Azure OpenAI, AWS Bedrock, and open-source LLM deployment. Recommend the best option considering privacy, cost, and long-term flexibility.

Governing AI for Risk & Compliance

- AI risk taxonomy: bias, hallucinations, privacy, IP, and security
- Responsible AI principles and governance frameworks
- Policies for GenAI and agentic AI usage
- Oversight structures such as AI governance boards
- **Case Studes:**

Global Retailer: Governing AI-Generated Marketing Content

A GenAI tool produced incorrect product claims in marketing campaigns. Design governance policies to manage content review, risk monitoring, and responsible AI

Managing GenAI & Agentic AI Projects

- Agile and hybrid execution models for AI programs
- Managing uncertainty in AI development
- MVP vs scalable foundation decisions
- Decision checkpoints and continuation criteria
- **Case Studies:**

Logistics Company: Struggling AI Demand Forecasting Project.

A forecasting system has failed to deliver accurate predictions after nine months. Decide whether to continue, pivot, or terminate the project.

Scaling AI Across the Enterprise

- Enterprise AI scaling patterns and reusable platforms
- Standardization vs flexibility across business units
- Managing prompt drift, model drift, and operational costs
- Governance and infrastructure for scaling AI deployments
- **Case Studes:**

Consumer Goods Company: Scaling AI Beyond Pilots

The company has three successful AI pilots but struggles to scale them across 20+ global business units. Recommend a strategy for scaling AI while maintaining governance and efficiency.

Leading AI Transformation

- Driving AI adoption across teams and functions
- Managing cultural and organizational resistance
- Building AI capabilities and literacy across the organization
- Executive dashboards and communicating AI value to stakeholders
- **Case Studes:**

Industrial Conglomerate: Designing an AI Transformation Roadmap.

Develop a 12-month AI roadmap for manufacturing, logistics, and engineering divisions. Identify priority initiatives and expected business value.

Job Readiness Module

From Learning to Industry-Ready AI Professional

The Job Readiness Module is a dedicated, structured component designed to help learners, confidently transition from training to real-world AI roles. This module ensures you are not only technically skilled but also professionally prepared to succeed in interviews and on the job.

Industry-Ready Project Portfolio

Apply your Generative AI and Agentic AI skills to real-world, domain-specific capstone projects. Each project is designed to simulate actual industry use cases, helping you demonstrate practical problem-solving and end-to-end AI solution development.

Resume & CV Optimization

Expert-guided sessions to:

- Structure AI-focused resumes aligned with industry expectations.
- Highlight GenAI, LLM, RAG, and Agentic AI projects effectively.
- Position your profile for roles like GenAI Engineer, LLM Engineer, AI Product Specialist, and Agentic AI Developer.

Mock Interviews with Expert Feedback

- Technical interview simulations based on real hiring patterns.
- GenAI, LLM, system design, and project discussion rounds.
- Personalized feedback to identify gaps and improve confidence.

LinkedIn Profile & Personal Branding

- Optimize your LinkedIn profile for AI and GenAI roles.
- Learn how to showcase projects, certifications, and skills.
- Improve recruiter visibility and professional positioning.

Interview Preparation Material

- Curated interview questions and scenarios.
- Concept revision guides for Generative AI, LLMs, RAG, Agents, and ML foundations.
- Guidance on explaining projects, architecture, and business impact.

Certification & Career Validation

- Preparation support for the **NASSCOM Certification Test**
- Strengthen credibility with industry-recognized certification

Introducing the

INTTRVU.AI CAREER PORTAL

One year of career support. Smarter preparation. Better opportunities.

Your learning journey deserves a strong career outcome. Every learner who completes an INTTRVU.AI program gets 12 months of access to our AI-powered Career Portal, supporting you with CV building, interview readiness, and relevant job opportunities.

EVERYTHING YOU NEED TO GET CAREER-READY

AI Resume Builder
Create and customize your CV for specific job roles and employer requirements.

Expert CV Review
Get personalised feedback on your CV from our Placement Team.

AI Mock Interviews
Practise realistic interview scenarios with an AI interview coach and receive feedback.

Mock Interviews with Hiring Managers
Get feedback through live practice sessions with hiring managers.

Skill Assessments
Assess your skills, identify gaps, and improve your job readiness.

AI-Powered Job Matching
Discover job recommendations based on your skills, interests, and profile.

Job Board with Search & Filters
AI career opportunities across a wide employer network, with easy search and filters.

Instant Job Alerts
Receive notifications when relevant positions are posted.

YOUR NEXT OPPORTUNITY STARTS HERE.

Career support that continues for a full year after your program ends.

Included for every learner who completes an INTTRVU.AI program.

Tools & Technologies

Programming & AI Development:

Python | Scikit-learn | TensorFlow

Generative AI & LLMs:

OpenAI | Gemini | Hugging Face

AI Agents & Frameworks:

CrewAI | LangChain | Phidata

LLM Fine-Tuning:

Unsloth | PEFT

Workflow Automation & AI App Platforms:

n8n | Dify | Activepieces

Cloud Platforms:

Microsoft Azure | AWS Bedrock

Capstone Projects

What is a Capstone Project?

Capstone projects are the culmination of your learning journey where you apply all your skills to solve real-world, domain -specific problems.
Each project simulates a professional AI use case, enabling you to demonstrate your technical and problem-solving capabilities to employers.

Why Capstone Projects Matter?

- Apply theory to practical, end-to-end solutions
- Gain experience in building deployable AI systems
- Strengthen your portfolio with domain-relevant projects
- Showcase your readiness for real industry challenges

Why Domain-Specific Projects?

Working across multiple domains such as Finance, Healthcare, E-commerce, Manufacturing, and Automotive helps you build a versatile skill set and demonstrates your adaptability.
Domain expertise enhances employability by showing you can apply AI in business-critical contexts.

Domain-Specific Capstone Projects

FINANCE

GenAI-Powered Financial News Sentiment Analyzer

Leverage LLMs to extract, analyze, and visualize market sentiment from real-time financial news and reports.

Intelligent Financial Risk Retrieval & Analysis Assistant

RAG-based or Multi-Agent AI system that retrieves, analyzes, and summarizes key risk factors from financial statements, policies, and regulatory documents.

AI-Powered Personalized Banking Chat Assistant

Conversational agent offering personalized financial insights, transaction summaries, and real-time customer support.

Fine-Tune LLM on Large-Scale Financial Data for Domain-Specific Use Cases

Develop a domain-adapted LLM trained on financial data to enhance performance on specialized tasks such as sentiment analysis, credit assessment, or compliance reporting

AUTOMOTIVE & MANUFACTURING

Smart Manufacturing Knowledge & Safety Retrieval Assistant

RAG-powered assistant that provides instant access to standard operating procedures (SOPs), equipment manuals, safety protocols,and compliance documentation.

Fine-Tuned LLM for Automotive Documentation & Quality Analysis

Domain-specific LLM fine-tuned on automotive manuals, inspection reports, and quality logs to assist in issue resolution, defect analysis, and report generation.

AI-Powered Maintenance Knowledge Retrieval & Recommendation Assistant

RAG and multi-agent-based assistant that helps technicians troubleshoot issues by retrieving relevant repair procedures, maintenance records, and part details

HEALTHCARE

AI-Driven Healthcare Knowledge Retrieval System
RAG-powered assistant that retrieves and summarizes relevant medical research, clinical guidelines, and treatment options from trusted sources.

Intelligent Medical Information & Diagnosis Support Agent
Conversational AI that assists healthcare professionals and patients with symptom understanding, treatment guidance, and medical terminology clarification.

Fine-Tuned Medical Q&A Assistant
Domain-specific LLM fine-tuned on medical literature to provide accurate, explainable answers to clinical and health-related questions

Multi-Agent Healthcare Knowledge Workflow Assistant
Collaborative AI agents that work together to retrieve, summarize, and validate healthcare information across multiple data sources.

TELECOM & CYBERSECURITY

Intelligent Threat Intelligence Retrieval & Analysis Assistant
RAG-powered multi-agent system that fetches, aggregates, and summarizes the latest cybersecurity threat reports, vulnerability advisories, and incident analyses to support telecom security teams.

Conversational Network Security Chat Assistant
LLM-based conversational agent designed to help network administrators query firewall logs, intrusion alerts, and configuration policies in natural language, providing actionable recommendations.

Fine-Tuned LLM for Telecom Security Incident Reporting & Analysis
Domain-adapted LLM fine-tuned on telecom security incident reports, log files, and compliance documentation to assist in rapid incident triage and root cause analysis.

E-COMMERCE

AI-Powered Product Review Sentiment Analyzer

LLM-based system that analyzes and summarizes large volumes of product reviews to uncover customer sentiment and emerging market trends.

Intelligent Product & Policy Information Retrieval Assistant

RAG-enabled conversational assistant that provides instant, accurate answers about products, return policies, or shipping details

Agentic AI Product Description Generation Assistant

Multi-Agent AI system that autonomously analyzes product data, specifications, and customer insights to generate high-quality, SEO-optimized product descriptions and marketing content.

Case Studies for Enterprise AI Leaders

These dedicated, real-world case studies are designed for professionals aspiring to leadership roles in Artificial Intelligence. The projects can be tailored to your domain expertise, such as banking, finance, telecom, automotive, manufacturing, or supply chain. By working on these initiatives, participants will strengthen their portfolio for AI leadership roles and be ready to drive immediate business impact through AI within their organizations.

1. Enterprise GenAI Transformation Strategy

Objective :

Design a comprehensive enterprise-wide Generative and Agentic AI strategy that identifies high-impact use cases, prioritises investments, and delivers measurable business ROI across any industry.

Problem Statement :

A large enterprise intends to adopt Generative and Agentic AI to improve efficiency, innovation, and decision-making but lacks clarity on where to begin, which use cases will deliver measurable ROI, and how to scale AI responsibly across the organisation. Leadership requires a structured roadmap to identify high-impact opportunities, manage risks, select appropriate technology platforms, and ensure measurable business outcomes aligned with business goals.Participants will develop a strategic AI transformation plan that includes use case prioritisation, ROI estimation, governance and risk framework, technology and vendor considerations, and a phased execution roadmap for enterprise-wide AI adoption.

2. AI Governance, Risk & Responsible AI Framework for an Enterprise

Objective :

Develop a comprehensive AI governance and responsible AI framework to ensure safe, compliant, and ethical use of Generative and Agentic AI across the enterprise.

Problem Statement :

An organisation plans to deploy GenAI tools such as chatbots, copilots, and AI agents across departments but faces risks related to data privacy, hallucinations, bias, intellectual property leakage, and regulatory compliance. Leadership requires a structured governance model to monitor AI systems, ensure ethical usage, manage compliance, and build trust among stakeholders. Participants will design a governance framework covering risk taxonomy, policy guidelines, compliance checklists, and monitoring mechanisms.

3. Build vs Buy vs Partner: Enterprise AI Platform Decision Strategy

Objective :

Evaluate and recommend the optimal AI technology strategy (build in-house, buy platforms, or partner with vendors) for implementing enterprise-scale Generative AI solutions.

Problem Statement :

A mid-to-large organisation seeks to implement AI-powered automation and copilots but is uncertain whether to build custom AI solutions, adopt platforms such as Azure OpenAI or AWS Bedrock, or partner with external vendors. Poor decisions may lead to high costs, vendor lock-in, scalability challenges, and security risks. Participants will analyse business requirements, compare platforms, assess cost and risk, and propose a comprehensive enterprise AI technology strategy aligned with long-term business goals.

Your Learning Journey Partner

Each learner enrolled in this **Advanced Certification Program** is assigned a **Learning Journey Partner** who guides and supports you throughout your learning journey.

Learning Journey Partner plays a key role in ensuring your overall growth, consistent progress, and a smooth, engaging learning experience.

Roles and Responsibilities of a Journey Partner

- ✓ Acts as your personal point of contact throughout your program duration.
- ✓ Provides timely guidance and assistance to resolve any academic or administrative queries.
- ✓ Monitors your learning progress and ensures you stay on track with personalized follow-ups and motivation.
- ✓ Facilitates a positive and engaging learning environment, connecting you with mentors and resources when needed.

How to Seek Assistance?

After onboarding, your Learning journey partner will connect with you via WhatsApp and email.
Your queries will be acknowledged promptly, and your Learning journey partner will ensure timely resolution.

Career Guidance & Mentorship

Personalized Career Guidance Sessions

to help you navigate opportunities in the fast-evolving GenAI and Agentic AI landscape

1:1 Mentorship with Industry Experts

to refine your learning path, portfolio & project presentation

Expert-Guided CV & LinkedIn Profile Review

to position your profile for top AI and tech roles

Career Mapping Support

to align your skills and interests with trending roles like AI Engineer, LLM Developer, and Agentic AI Specialist

Portfolio & Project Positioning Tips

to showcase your hands-on GenAI and Agentic AI expertise effectively

Continuous Mentor Check-ins

to track your growth and provide actionable feed-back for improvement

Meet Your Mentors

**Backed by 25+ industry mentors in leadership roles.
Here are a few of them.**

Kushagra Agarwal
Asst. Vice President

Testimonials

Google Ratings 4.7 ★★★★★

Nitin Jethwani

Role: Senior Data Scientist

Exp.: 10+ yrs

BAJAJ FINSERV

The course material was comprehensive and straightforward, directly addressing today's job market needs. Rohit was always on hand, providing personalized feedback that was crucial for improvement. Mock interviews felt incredibly authentic, boosting my confidence and skill significantly. One of the most astonishing outcomes of this journey was the significant salary hike I achieved, thanks to the negotiation skills learned through the program. I secured a position with a **130% higher salary** than my previous role. The number of offers (10+) I received allowed me to choose a role that was not just financially rewarding but also aligned with my career aspirations and values.

Shivam Agrawal

Role: Data Scientist

Exp.: 9+ yrs

virtusa
Accelerating Business Outcomes

I attended a data science course offered by INTTRVU.ai and had an excellent experience. The course content is very streamlined and focuses on the most relevant topics for today's job market and advancements. The pace of teaching is excellent. Mr. Rohit frequently takes feedback from students to ensure everyone is keeping up. There are separate sessions each week dedicated to solving doubts. Through the support of INTTRVU.ai, I received a **100% hike** in my first offer from an MNC. Highly recommended for those looking to transition into the data science space. The course is great value for money and time well spent.

Rudesh More

Role: AI-ML Specialist

Exp.: 10+ yrs

accenture

I feel fortunate to have discovered Inttrvu.ai. Their study material is updated with current AI/ML trends, it is precise and crisp, which helps you prepare quickly for interviews. They also provide mock interviews which is a crucial part, where you learn to answer questions confidently. The staff and faculty are always available. Rohit Sir, the head of the institute, guides you through every phase, from understanding technical concepts to interview preparation. He keeps you motivated in this competitive field. Thanks to Rohit Sir, under his guidance I secured a data science role with a **70% salary hike!**

Ranjith Kumar

Role: Senior Customer Support Manager

Exp.: 15+ yrs

The Generative AI course at INTTRVU.AI has significantly improved my understanding of modern AI technologies. The practical assignments, live sessions, and project-based learning made it easier to apply concepts in real-world scenarios. The course boosted my confidence in working with Gen AI tools and frameworks. Thank you to the entire team for such a valuable learning experience.

Dhaval Bhamre

Role: Lead Software Engineer

Exp.: 14+ yrs

My experience with INTTRVU.AI was excellent. The course gave me a strong foundation in Generative AI and Agentic AI. The sessions were informative, interactive, and helpful, with practical examples that made it easier to understand the concepts. I especially appreciated the hands-on approach and exposure to various AI tools and technologies. It was a valuable learning experience that helped me enhance my skills and build greater confidence in exploring the field of AI.

Niraj Gupta

Role: Technical Lead

Exp.: 14+ yrs

I enrolled in this course to learn about Generative AI, and I'm glad I did. The mentors explain concepts patiently, and the course includes useful hands-on activities. The support team responds quickly to queries, making the learning process smooth. I feel more confident applying Gen AI concepts now. Thank you for a great learning experience.

Hazarath reddy

Role: Product Manager

Exp.: 14+ yrs

I had a great learning experience with INTTRVU.AI. The course provided a clear and practical understanding of Data Science, ML, NLP, Generative AI and Agentic AI, with concepts explained in a structured and easy-to-understand manner. The trainer was knowledgeable, supportive, and did an excellent job of connecting the concepts with real-world use cases. The sessions were engaging, informative, and helped me build a stronger perspective on how AI can be applied in real-world products and business scenarios. Overall, it was a valuable and worthwhile learning experience, and I would highly recommend INTTRVU.AI to anyone looking to strengthen their understanding of AI.

Aman Bhagirath

Role: Technical Specialist

Exp.: 14+ yrs

DAMCO

Gen AI course has been a great learning experience. It helped me understand AI concepts in a practical and easy-to-understand way. The mentors are highly knowledgeable and explain complex topics using relevant real-world examples. I particularly enjoyed the hands-on projects, which made the learning process engaging and effective. The supportive and interactive learning environment made the overall experience even better. I am happy with the course and would definitely recommend it to anyone looking to build practical knowledge of Gen AI.

Kunal Gupta

Role: Sr. Systems Engineer

Exp.: 5+ yrs

Infosys

The Generative AI course at INTTRVU.AI has been a great learning platform so far. The combination of theory, practical demonstrations, and mentor guidance has made the learning process smooth and enjoyable. Every session provides practical insights that can be applied in real-world scenarios. The mentors are approachable, knowledgeable, and always willing to clarify doubts. I'm excited for the upcoming sessions and look forward to deepening my AI skills.

Pankaj Kumar Giri

Role: Information System Consultant

Exp.: 9+ yrs

LUMEN TECHNOLOGIES

I'm currently enrolled in the Generative AI course at INTTRVU.AI, and my experience has been very positive so far. The sessions are well structured, the mentors explain concepts clearly, and the hands-on approach makes learning engaging and practical. The real-world examples and interactive discussions have helped me understand complex concepts with ease. I'm looking forward to exploring the upcoming modules and further strengthening my AI skills.

Aaron Joel Fernandes

Role: R&D Devops Engineer

Exp.: 14+ yrs

NOKIA Connecting Intelligence

INTTRVU.AI Machine learning and data science course is taught by extremely knowledgeable and experienced faculty. Curriculum is very designed which includes even the latest trends like Gen AI and Deep learning. The labs are very hands on and delve into practical data sets for practice. Data science being very vast can often be overwhelming but the structured and succinct approach taken by this institute makes the learning manageable without being too caught up into endless complexities. Practice exercises provided instill confidence.

Siddhartha Singh

Role: AI-ML Engineer

Exp.: 20+ yrs

アルフレッド Alfred

Definitely recommend INTTRVU.AI to anyone looking to start fresh or move into data science and AI! Had a great experience with them. As someone switching careers, their support really made a difference. They connected me with genuine placement opportunities and guided me through the whole process. I've received a couple of interview calls after finishing my data science and AI program. The team's follow-ups and constant updates made everything super smooth.

Naveen kumar

Role: Assistant Manager
Reporting and Analytics

Exp.: 15+ yrs

EY

I'm Naveen Kumar from Bengaluru, an Analytics & AI professional with 15+ years of experience. The Generative AI course at INTTRVU.AI has helped me understand AI concepts in a practical and structured way. The mentors are highly knowledgeable, and the hands-on projects with real-world examples have made learning engaging and applicable. Overall, I'm very satisfied and would confidently recommend this course to professionals looking to build practical GenAI skills.

Venkatesh Pappu

Role: Associate Consultant

Exp.: 11+ yrs

INFOYA

This is a great platform for learning AI topics. The facilities are also good, and they provide useful exercises to help us understand the concepts better. They also provide recordings for each session, which is very helpful for revision. I would definitely recommend this platform to others.

Dibbosh Baruah

Role: General Manager

Exp.: 20+ yrs

TDC TRAVEL DEALS ONLINE

The AI and ML course offered by INTTRVU was truly exceptional. The curriculum was thoughtfully designed and well-structured, seamlessly blending strong theoretical foundations with hands-on practical applications. Each concept was explained with clarity, making complex topics easier to grasp. The projects were engaging, industry-relevant, and closely aligned with real-world use cases, which helped in applying learning effectively. Overall, the program significantly strengthened my understanding of AI and ML and boosted my confidence in solving practical business problems.

Valli Raja Sekar

Role: Senior Data Scientist

TE connectivity

Rohit sir helped me in the preparation for cracking the product based company in data science with **125% hike**. He had provided the immense material on the Golden standard which helped me to crack the interview and one of the most important aspects is the mock Interview. The gaps will be identified and you can feel immense confidence while appearing for the next interview.

INTTRVU provided a well-structured and practical approach to dat science learning, focusing strongly on industry best practices. The lectures were clearly delivered, well-organized, and easy to follow, making complex concepts easier to understand. Regular assignments were provided and carefully reviewed, with attention given to individual contributions, which helped reinforce learning and accountability. Overall, the program offered a disciplined, supportive, and highly effective learning experience that added real value to my professional growth

Priyanka Chandrashekhar

Role: Principal Software Engr.

PNC

INTTRVU.ai Machine learning and data science course is taught by extremely knowledgeable and experienced faculty. Curriculum is very designed which includes even the latest trends like GEN AI and Deep Learning. The labs are very hands on and delve into practical data sets for practice. Data science being very vast can often be overwhelming but the structured and succinct approach taken by this institute makes the learning manageable without being too caught up into endless complexities. Practice exercises provided instill confidence.

Sanmay Kokate

Role: Generative AI Engr.

Exp.: 8+ yrs

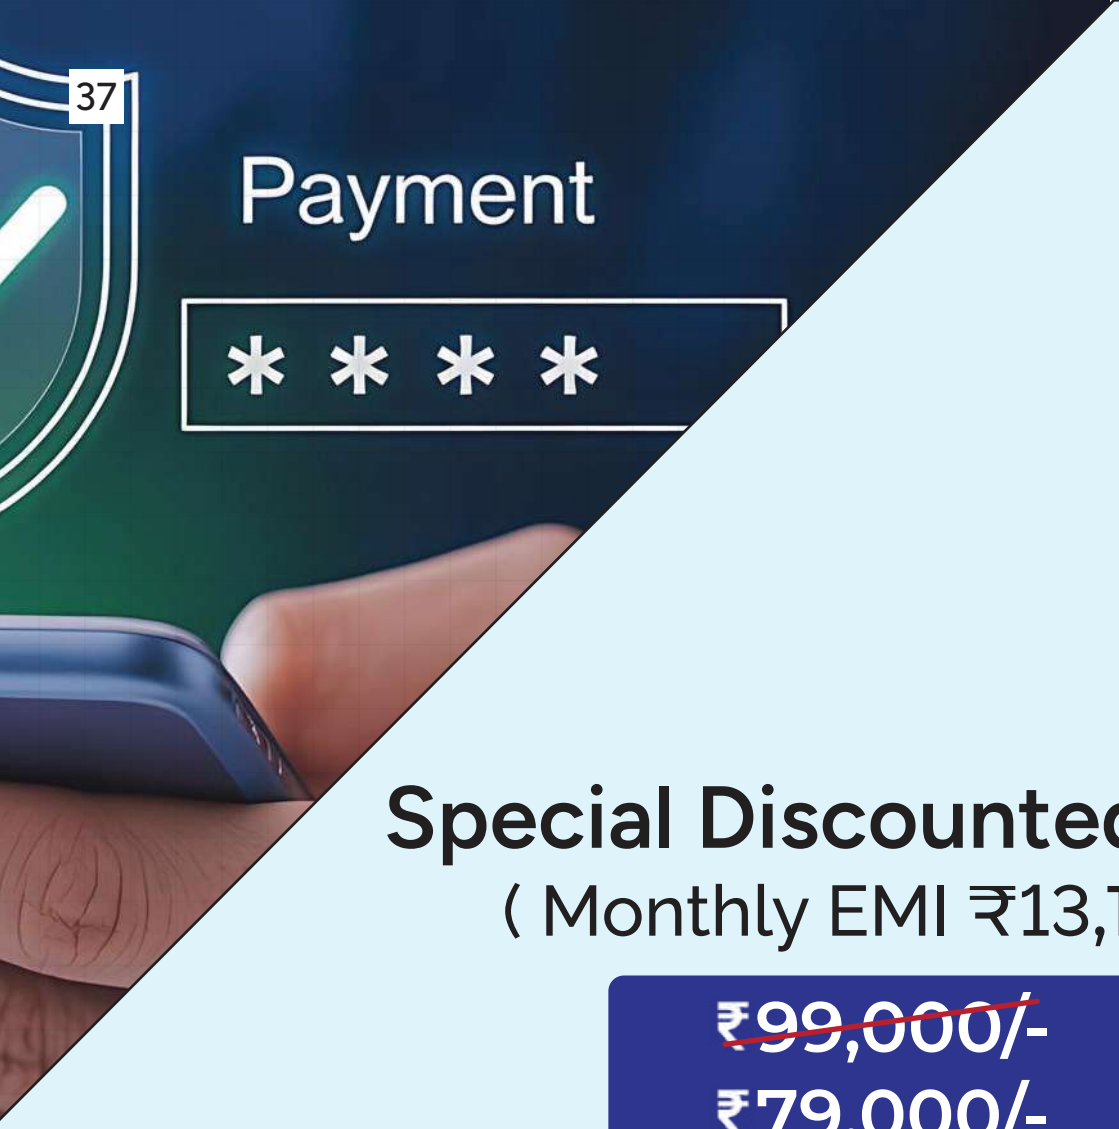

Capgemini

Definitely recommend Inttrvu.ai to anyone looking to start fresh or move into data science and AI! Had a great experience with them. As someone switching careers, their support really made a difference. They connected me with genuine placement opportunities and guided me through the whole process. I've received a couple of interview calls after finishing my data science and AI program. The team's follow-ups and constant updates made everything super smooth.
